 <u>Contacts</u>

1. Installation of WIND Connection Manager

- Please start Windows and close all other applications. •
- Please insert the CD, if you have activated Auto Play the installation routine will start • automatically. Otherwise please go to Start->Run and enter D:\WINDConnectionManager.exe, where D: would be your CD drive. Click OK to execute the command.
- Please select the appropriate language. •
- Installation will be executed.
- Please plug in the data card (do not forget to have inserted a SIM card) and click on • "Detect".

2. Starting the WIND Connection Manager for Laptops

WIND Connection Manager offers everything you need to manage the mobile Internet communication on your Laptop:

Internet connection and Email download

- SMS/MMS Manager
- Managing contacts from SIM and Outlook

After installing the WIND Connection Manager, a new entry will be placed in the program menu. Straight after installation, the main window of the application is visible on your screen. In case this does not happen, you can start the application from "Start -> Programs -> WIND Connection Manager". Whenever the application is active a status icon will also appear in the toolbar in the bottom right-hand corner of your desktop

The main window of the WIND Connection Manager is at the heart of the application. Here you can see the status of your WIND Connection Manager, how much time you have spent on the internet and which data throughput you should expect. You can connect to the internet and send emails or short messages from this window. You will find the following buttons and symbols on the main window:

	WIND Connection Mana	ger
	Detect SMS/MMS Connect Web Email	
۵		
	Details Status: Ready	
	Status: Ready Port: PCMCIA / USB	
	Device: Novatel XU870	
	Network: WIND Hellas 3G	
۵		
	Statistics	
	Data In: 0 KB Speed: 0 Kbp	5
	Data Out: 0 KB Max. Speed: 0 Kbp	s
	Total: 0 KB Time: 0:00:0	0

[Image 1]

The main application is split into three areas. By tapping on the buttons 0 you can expand/collapse the window areas:

- Area "Menus and Connection Management"
- <u>Area "Details"</u>
- <u>Area "Statistics"</u>

2.1 Area "Menus and Connections"

[Image 2]

This area is split in 2 areas:

Area A

Button	Description		
Ŷ	 Settings Profile (managing your profiles) Network (selecting connection and network) History (data volume transferred) PIN (PIN settings) Info 		
Ŀ	 Update database Update database (roaming partner) Install drivers 		
?	Help		
	Minimize Icon will appear in system tray area		
×	Close		

Area B

Button	Description
Detect	Detect Button enabled only if your are not connected to the Internet with a data card. Tap on this button to detect your hardware and network parameter.

SMS/MMS Button only enabled if no mobile Internet connection via data card. Link to the implemented SMS/MMS application
Connect Button to connect or disconnect
Web Link button to preferred browser
Email Link button to preferred Email application

Indicator	Description
	Indicator of network signal strength

2.2 Area "Details"

Details				
	Status:	Ready		
	Port:	PCMCIA / USB		
	Device:	Novatel XU870		
	Network:	WIND Hellas	3G	

[Image 3]

Details about your connection

Label	Description
Status	 Connecting to modem Ready, you can establish connection Connected Failure
Port	Port of data card
Card	Card's name
Network	Network name and network mode

2.3 Area "Statistics"

Statistics			
D ata In:	2670.3 KB	Speed:	1109 Kbps
Data Ourt:	137.1 KB	Total:	2807.4 KB
Max. Speed:	1109 Kbps	Time:	0:00:52

[Image 4]

Statistics provide advanced information about your connection. All shown data values are approximate values.

3. Connection

- 1. Insert your data card and wait until your operation system recognizes the data card.
- 2. Start the WIND Connection Manager and wait until detection has been completed. If you see a detection problem, please reinsert your data card and tap on the detect button. First time using the software this can take about 2 minutes.

If Pin Security is active, a window will pop up asking you to enter your SIM PIN. You can deactivate PIN security in the application if no connection is active: Settings -> PIN -> Deactivate PIN.

_	WINE	.	×
	Please enter PIN	4: [
0	ок	Cancel	

[Image 5]

3. By default the software comes with the connection profile **"WIND Hellas"**. These are the standard settings to establish an internet connection on the WIND Hellas network. You can modify the standard access details by selecting the "Settings" menu.

4. Now tap on the connect button.

[Image 6]

4. Settings

To access the Settings menu tap in main window on the button $\ensuremath{\mathbb{C}}$

You are free to create your own connection profile. Once a new profile has been created it will appear in the dropdown menu Profiles. You can select it by tapping on Set Profile to use it.

	Settings		Settings	×
Profile Network	K History PIN Info		Profile Network History PIN Info	
Profiles	Personal 🔹	0	Profiles Personal	0

Port:			Port:]
	Set Profile		Set Profile	

[Image 8]

Button	Description
0	Create a new profile
Ø	Edit a profile
\otimes	Delete a profile
8	Save a profile
Set Profile	Set the Profile you want to use

Label	Description						
Profile Name	Profile name, should be unique, use only Latin characters						
APN	Access Point Name of your network operator. For more details contact your network operator.						
Username	Username. For more details contact your network operator.						

Password	Password. For more details contact your network operator.
DNS	Domain Name Server. For more details contact your network operator.
Proxy settings	Necessary Proxy Settings of your network. For more details contact your network administrator.

4.2 Network

You are offered two options: "Select Connection" and "Select Network".

	Settings 🛛 🕅
Profile	Network History PIN Info
۲	Select Connection
	Select automatically
	Use GPRS only
-	Only use UMTS/HSDPA
0	Network Selection
	Operator
	Apply

[Image 9]

- Select Connection Select Network •
- •

4.2.1 Select Connection

	Settings 🛛 🖂
Profile	Network History PIN Info
•	Select Connection Select automatically Use GPRS only Only use UMTS/HSDPA Network Selection Operator
	Apply

[Image 10]

Three different settings are available here:

Label	Description
Select automatically	Selects the best suited network available
Only use GPRS	Use only GPRS for a connection
Only use UMTS/HSDPA	Use only UMTS/HSDPA for a connection.

Select and tap on Register. If the change is successful you will retrieve a message "Network changed successfully".

Close this window and wait until you see signal strength in the main window, then you can establish a connection.

Attention: Changing the connection mode can block your data card. If you can not establish an internet connection, take out the data card, close the WIND Connection Manager, reinsert the data card, start the WIND Connection Manager anew and tap on detect. Wait until you see the signal strength in the main window. Now you can establish the connection.

4.2.2 Select Network

In this dialog you may select any available network. It is useful when you are abroad. Automatic mode will select the preferred network of your network operator.

	Settings	×
Profile	Network History PIN Info	
0	Select Connection Select automatically Use GPRS only Only use UMTS/HSDPA	
۲	Network Selection Operator (Automatic Selection) T-Mobile D o2 E-Plus Vodafone (D2)	
	Apply	

[Image 11]

If you select "Network selection" you will get a list of network options.

- 1. Automatic Selection
- 2. Retrieving Networks...

The marked network is your logged-in network.

Attention: The network list will only appear if the "connection settings" is "Only use GPRS" or "Only use UMTS/HSDPA".

Select the network and tap on the register button. If the change is successful you will see the message "Network changed successfully".

Close this window and wait until you see the signal strength in the main window and then you can establish the connection.

4.3 History

Select a time frame to see sent/received data volume. Tap on "Reset" to reset the counter.

	Settings	×
Profile Network H	istory PIN Info

[Image 12]

4.4 PIN

You can Activate/Deactivate PIN or Change PIN.

- <u>Activate/Deactivate PIN</u>
- Change PIN

4.4.1 Activate/Deactivate PIN

Usually you have to enter the PIN each time you start WIND Connection Manager. Deactivate the PIN to avoid having to do this every time.

Settings 🛛 🛛
Profile Network History PIN Info
Deactivate PIN
PIN Entry: 0000
Change PIN
Current PIN:
New PIN:
Verify PIN:
Deactivate PIN

[Image 13]

4.4.2 Change PIN

This window lets you change your PIN.

Settings	×
Profile Network History PIN Info	
Deactivate PIN	
PIN Entry:	
Change PIN	
Current PIN: 0000 New PIN: 1234	
Verify PIN: 1234	
Change PIN	

[Image 14]

Label	Description					
Current PIN	Enter your current PIN					
New PIN Enter your new PIN						
Verify PIN	Enter once again the new PIN					

4.5 Info

Modem System Information

Settings	×

[Image 15]

5. SMS/MMS

SMS/MMS										• 🔀
Folders	XX Settings	New SMS/MMS	Reply	Forward	Move to	Delete	Send/Recv	Addresses		
		SMS/MMS								
SMS/MMS		Number Number: Date:	Nam	e	Message	_	Date	Download Size		* III *
Ready		,							NUM	1

[Image 16]

The SMS Center window is split into menu bar, folder view, folder content and preview window. To manage your short messages you may:

Button	Description
Folders	Create new folders
Settings	Change SMS settings
New SMS/MMS	Create new SMS/MMS messages
Reply	Reply to SMS
Forward	Forward SMS
Move to	Move SMS to a folder
Delete	Delete SMS
Send/Recv	Send and receive SMS/MMS (if supported)
Addresses	Manage Phone book contacts on SIM

1. Folder

By using this menu, you may change the folder structure of the SMS Center window:

Folders		— ———————————————————————————————————
Inbox Outbox Sent Drafts		
New Folder	Rename	Remove

[Image 17]

Button	Description
New Folder	Creates a new folder, name has to be unique
Rename	Renames an existing folder
Remove	Removes an existing folder (including the messages)

Attention: Predefined folder can't be deleted or modified

2. Settings

The "settings window" lets you change the deletion mode. You may choose whether to delete an SMS from the SMS Center, from the SIM or decide whether this should be asked at all. You may also activate an alarm signal when a new SMS arrives.

Settings 💽
General SMS
 Leave messages on SIM Save messages only on PC Always ask
Play sound when a new message arrives
OK Cancel Apply

[Image 18]

[Image 19]

3. New SMS

The "New Message" window is used to enter the SMS text. You may also input texts by copy & paste from other applications. The status bar at the lower right corner indicates the length of the SMS for your convenience: the first number tells you how many parts the SMS consists of (one part has max. 160 characters/unicode70), the second number counts down from 160/70 characters. The number in parenthesis () counts the total number of characters. The recipient for your SMS has to be entered in the "To" field. This can be either entered by typing digits or by clicking the "To" button to select a recipient from the address book. Recipient addresses may be taken from the SIM address book or from your email client's contact folder. Just select an address and click OK. To send the message click "Send/Receive".

New Message		×
SMS MMS		
To:		
Message:	*	
	-	
	SMS=1, 160(0)	I
	Send	el 📄

[Image 20]

In the same way you can send out an MMS message. Restrictions:

- 1. Only one recipient
- 2. Topic has to be written in Latin characters

New Message		×
SMS MMS		
Το:		
Subject:		
Message:		
	-	
+ ·		
	Send	el

[Image 21]

4. Reply

Highlight a message to which you want to reply, for example in the inbox folder, then click the "Reply" button. The "New Message" window opens and the recipient address is already filled in the "To" field. Continue as before when sending a new message.

5. Forward

Highlight an SMS, which you want to forward. Click the "Forward" button. The "New Message" window opens, however the message text is already copied. Continue as before when sending a new message.

6. Move SMS...

Highlight the SMS to be moved and click the "Move SMS" button. A small window opens that lets you select the destination folder. Select the folder to which the message should be moved, then click "Move".

7. Delete

Highlight the SMS which you want to delete. Click "Delete" to remove the message.

8. Send/Receive

Messages will be sent and/or received by pressing this button.

6. Contacts

This button opens the address book. You may add new contacts to your personal address book or you may change existing addresses, delete addresses or exchange them with your SIM card and your e-mail client application, or export the data set.

Addresses	- 0 🔀
